# There Are Many Reasons To Choose Reward

# Superior Features, Proven Results

### Versatile

Reward's distinct product line allows a choice of foam and concrete thickness suitable for any job you may confront.

### Easy

Reversible forms with no top or bottom, no right or wrong side and no left or right corner make stacking easy with Reward ICFs.

### Fast

It's a snap to place horizontal rebar. With the loose fit 2-deep design, no need to tie the rebar.

### Straightforward

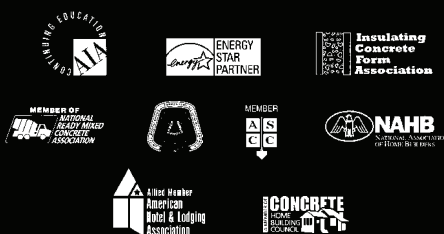

1-1/4" furring strips, recessed 1/2" and 6" on center allow for easy attachment of drywall and exterior finishes. Exterior foam provides easy placement of electrical wiring and plumbing.

### Solid

Achieving a straight and square insulated steel-reinforced structural wall is easy with Reward's patented designs.

### Strong

8 full length ties placed 6" on center plus several inches of foam on each side provide unmatched strength during concrete pours.

## Take A Look

With more than 18 years of experience in Insulating Concrete Form (ICF) construction, Reward Wall Systems wants to share the products and support needed to make your project a success.

*Take a look and you'll see:*

**Multiple Product Lines** – With a range of foam widths and concrete thicknesses, Reward gives you the perfect form for any project.

**Four Steps in One** – A more effective method of construction allows smaller crews to not only assemble a wall but also install insulation, an air barrier and a vapor barrier all in one step.

**Designed with Installation in Mind** – The reversible design of Reward ICFs makes stacking quick and easy. Forms manufactured with ties six inches on center provide stronger performance during concrete placement.

## Beyond The Block

Working with Reward doesn't mean a one time exchange and then using ICFs on your own. Instead, work with some of the most experienced ICF professionals in the industry to determine the best way to proceed with your specific project.

*With Reward, you'll have access to:*

- An engineer who can help you with wall reinforcement, moisture concerns and building code compliance.
- An on-site specialist who can teach installation techniques and provide in-depth training.
- A listening ear to hear what you need and an innovative mind to deliver a product that will solve the problem.
- A customer service specialist who will listen to your needs and keep you up to date on where your order is and how long before it gets to you.

## Pass on the Benefits

Choosing Reward Wall Systems means a complete envelope solution for your customer's needs.

**Energy Savings** – Super-insulated walls ensure even temperatures year-round, saving as much as 50-80% on heating and cooling costs.

**Safety** – Reward walls are up to the challenges nature can supply. Able to withstand winds of up to 200 mph and resist fire for up to 4 hours, Reward ICFs protect the people inside and exceed customer expectations.

**Comfort** – With solid concrete walls, dust, mold, allergens, moisture and noises stay outside, giving occupants a healthy and peaceful environment

## Give Us A Call

At Reward, we want to give you the kind of ICF building you think you're going to get but might not achieve. That is, unless you think comprehensively about the role, function and interaction of ICFs with the rest of the structure you're going to build. So give us a call. We're here to help.

## Learn From Where We've Been

**In the City** – Projects ranging from office buildings to hotels and retail stores have seen the work of Reward ICFs and felt the speed of completing the project.

**At the Movies** – Expertise in quick installation and enormous structures, Reward knows soundproofing and how to enhance a sound system.

**In the Suburbs** – Creating a solid home is our pride and joy. Reward cares about the comfort and health of families looking for the perfect custom or multi-family home.
